The left diagram shows a circle with a square inscribed inside it. The square is rotated 45 degrees, so its vertices are at the midpoints of the circle's circumference. Lines connect each vertex of the square to the two adjacent vertices on the circle's circumference, creating a star-like pattern of triangles. A small red dot is located at the center of the circle.

The right diagram shows a circle with a square inscribed inside it, oriented with its sides parallel to the horizontal and vertical axes. Lines connect each vertex of the square to the two adjacent vertices on the circle's circumference, creating a star-like pattern of triangles. A small red dot is located at the center of the circle.

Red symbols indicate internal characteristics.  
Green symbols indicate external characteristics.
