The laboratory grow diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI"). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown in a laboratory rather than in nature. IGI is a leading authority in the diamond industry and has the most current equipment available to IGI, including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact optical spectrometer, and other instruments. IGI's equipment and procedures are the most advanced and accurate in the industry. IGI's instruments and/or processes are deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE. FOR ADDITIONAL INFORMATION, INCLUDING IMPORTANT LIMITATIONS AND DISCLAIMERS, PLEASE GO TO WWW.IGI.COM/IGI-CALL-1-800-BUY-IGI.
