The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation. 10% magnification, corrected inject louge, binacular microscopp, master color or with passes aftered as the control of explications of the color of the colo

Spect to the importance of an account of the special of the genetone deweight.

Weight.

The winds of the special of the genetone described herein. Please review the limitations and restrictions set porth online. For additional information, important limitations and disclaimers, please go to www.igi.org or call 1-888-buy-igis.
